

Practice — Fair Testing and Recording

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 · MCQ**[1]**

In science, a **fair test** means —

- (a) everyone gets a turn (b) only one variable is changed; the rest are kept the same
(c) the result is always positive (d) no measurements are taken

Q2 · MCQ**[1]**

Why do scientists **repeat** experiments?

- (a) to waste time (b) to make the result look nicer (c) to check the result is not a one-off accident
(d) to change the answer

Q3 · MCQ**[1]**

Which is the best reason to **keep notes** during an experiment?

- (a) so others can repeat the work and check it (b) to fill the notebook
(c) to avoid doing the experiment (d) notes are not needed

Q4 · TRUE / FALSE**[1]**

It is good practice to record unexpected things like the oil smelling or smoking.

- (a) True (b) False

Q5 · ASSERTION–REASON**[1]**

A: An investigation can end with new questions.

R: One round of results often suggests the next experiment.

- (a) Both A and R true, and R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

Doing experiments step by step, changing one thing at a time, is called _____ investigation.

Q7 · FILL IN THE BLANK

[1]

Repeating a measurement and getting the same result shows the result is _____ (one word).

Short answer (2 marks each)

Q8

[2]

What is a fair test? Give one example.

Q9

[2]

Give two reasons why keeping records during an investigation is important.

Q10

[2]

State two things you would keep the same when testing how the way of dropping dough affects puffing.

Long / application (3 marks each)

Q11

[3]

You want to find out if pricking a small hole in a puri before frying changes how it puffs. Describe a **fair** investigation: what you change, what you keep the same, what you measure, and how you make the result reliable.

Q12

[3]

A student fries one thick puri in very hot oil and one thin puri in warm oil, then concludes "thin puris puff better." Explain why this conclusion is not valid and how to make the test fair.
