

Practice — Lenses

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 · MCQ**[1]**

A convex lens is —

- (a) thicker at the edges (b) thicker in the middle (c) flat (d) always coated

Q2 · MCQ**[1]**

A convex lens is also called a _____ lens.

- (a) diverging (b) converging (c) plane (d) reflecting

Q3 · MCQ**[1]**

A magnifying glass is a —

- (a) concave lens (b) convex lens (c) plane mirror (d) convex mirror

Q4 · MCQ**[1]**

Unlike a mirror, a lens —

- (a) reflects all light (b) lets light pass through it (c) is always flat (d) cannot form images

Q5 · ASSERTION-REASON**[1]**

A: A concave lens always forms a diminished, erect image.

R: A concave lens diverges the light passing through it.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

A lens that is thicker at the edges than in the middle is a _____ lens.

Q7 · FILL IN THE BLANK

[1]

A convex lens _____ the light rays passing through it.

Short answer (2 marks each)

Q8

[2]

Differentiate between a convex and a concave lens by shape and effect on light.

Q9

[2]

How is a lens different from a mirror?

Q10

[2]

Name one use each of a convex and a concave lens.

Long / application (3 marks each)

Q11

[3]

A drop of water placed over printed text makes the letters look bigger. Explain why, and which lens it behaves like.

Q12

[3]

Compare a convex mirror and a convex lens: how does each affect a parallel beam, and how do we view images with them?
