

Practice — Size, Atmosphere and Magnetic Field

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 · MCQ**[1]**

Earth can hold an atmosphere because of its right size and hence its —

- (a) colour (b) gravity (c) magnetic field (d) speed

Q2 · MCQ**[1]**

The ozone layer protects life by blocking —

- (a) oxygen (b) ultraviolet (UV) rays (c) sunlight fully (d) rain

Q3 · MCQ**[1]**

Earth's magnetic field is believed to come from —

- (a) the Moon (b) molten iron moving in the core (c) the oceans (d) the atmosphere

Q4 · MCQ**[1]**

The magnetic field shields Earth from —

- (a) cosmic rays and solar wind (b) rain (c) sound (d) gravity

Q5 · TRUE / FALSE**[1]**

Ozone is just ordinary oxygen.

- (a) True (b) False

Q6 · FILL IN THE BLANK**[1]**

The layer that blocks UV rays is the _____ layer.

Q7 · FILL IN THE BLANK

[1]

Charged particles from the Sun that the magnetic field deflects are called the solar _____.

Short answer (2 marks each)

Q8

[2]

Why is Earth's size important for life?

Q9

[2]

What is the role of the ozone layer?

Q10

[2]

How does Earth's magnetic field help sustain life?

Long / application (3 marks each)

Q11

[3]

Describe three factors (besides distance from the Sun) that make Earth suitable for life.

Q12

[3]

Explain how Earth's atmosphere protects and supports life in two different ways.
