

Mock Test — Our Home: Earth, a Unique Life-Sustaining Planet

A mixed paper covering the whole chapter. Total: 20 marks. Section A is interactive.

Objective (1 mark each)

Q1 • MCQ

[1]

Earth supports life mainly because of its —

- (a) right distance from the Sun (b) blue colour (c) one moon (d) fast spin

Q2 • MCQ

[1]

The hottest planet is —

- (a) Mercury (b) Venus (c) Mars (d) Earth

Q3 • MCQ

[1]

The ozone layer protects us from —

- (a) UV rays (b) rain (c) wind (d) gravity

Q4 • MCQ

[1]

Earth's magnetic field shields us from —

- (a) cosmic rays and solar wind (b) sound (c) rainfall (d) earthquakes

Q5 • MCQ

[1]

Plants release oxygen during —

- (a) respiration (b) photosynthesis (c) digestion (d) evaporation

Q6 • TRUE / FALSE

[1]

A mild greenhouse effect is harmful and keeps Earth too cold.

- (a) True (b) False

Q7 · FILL IN THE BLANK

[1]

The zone where liquid water can exist is the _____ zone.

Q8 · FILL IN THE BLANK

[1]

About _____ per cent of Earth's surface is covered with water.

Short answer (2 marks each)

Q9

[2]

Why is Earth's distance from the Sun important for life?

Q10

[2]

State the roles of the ozone layer and Earth's magnetic field.

Q11

[2]

How do photosynthesis and respiration balance the gases in air?

Long / application (3 marks each)

Q12

[3]

List and explain three factors that make Earth uniquely able to support life.

Q13

[3]

Explain why Venus is hotter than Mercury, and what this teaches us about the greenhouse effect on Earth.
