

Practice — The Microscope and the Discovery of the Cell

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 • MCQ

[1]

Who first used the word **cell** in science?

- (a) Antonie van Leeuwenhoek (b) Robert Hooke (c) Alessandro Volta (d) Charles Darwin

Q2 • MCQ

[1]

Antonie van Leeuwenhoek is known as the —

- (a) Father of Microbiology (b) Father of Genetics (c) Father of Physics (d) Father of Botany

Q3 • MCQ

[1]

The word **lens** comes from a word meaning —

- (a) glass (b) lentil seed (c) water (d) eye

Q4 • MCQ

[1]

Which microscope can magnify a cell about **10,00,000 times**?

- (a) magnifying glass (b) light microscope (c) electron microscope (d) paper microscope

Q5 • TRUE / FALSE

[1]

The cells Hooke saw in cork were living cells.

- (a) True (b) False

Q6 • FILL IN THE BLANK

[1]

Hooke published his drawings in a book called _____.

Q7 · FILL IN THE BLANK

[1]

A water-filled round flask placed over a book acts like a _____ glass.

Short answer (2 marks each)

Q8

[2]

Why could people not study microorganisms for a long time, and what changed that?

Q9

[2]

State the approximate magnification of a light microscope and of an electron microscope.

Q10

[2]

What did Robert Hooke observe in cork, and what did he call it?

Long / application (3 marks each)

Q11

[3]

Compare the contributions of Robert Hooke and Antonie van Leeuwenhoek to our understanding of the microscopic world.

Q12

[3]

A foldable paper microscope is cheaper but shows less detail than a laboratory microscope. Give one advantage and one limitation, and explain why such tools are still valuable.
