

Practice — Cell Structure, Cell Types and Levels of Organisation

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 · MCQ**[1]**

Which part is found in a **plant cell but not** an animal cell?

- (a) cell membrane (b) nucleus (c) cell wall (d) cytoplasm

Q2 · MCQ**[1]**

Which part **controls all activities** of the cell?

- (a) cytoplasm (b) nucleus (c) cell membrane (d) vacuole

Q3 · MCQ**[1]**

Bacteria differ from other cells because they have —

- (a) a true nucleus (b) a nucleoid (no nuclear membrane) (c) chloroplasts (d) no membrane

Q4 · MCQ**[1]**

Correct order of levels of organisation:

- (a) Cell → Organ → Tissue → Organism
(b) Cell → Tissue → Organ → Organ system → Organism
(c) Tissue → Cell → Organ → Organism (d) Organism → Organ → Cell

Q5 · ASSERTION-REASON**[1]**

A: A muscle cell is spindle-shaped and flexible.

R: Its shape helps it contract and relax to move food along.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

To see onion-peel cells clearly we stain them with _____ (a red stain).

Q7 · FILL IN THE BLANK

[1]

An organism made of only one cell is called _____.

Short answer (2 marks each)

Q8

[2]

Name the three basic parts of a cell and give the function of each.

Q9

[2]

Give two differences between onion-peel cells and human cheek cells.

Q10

[2]

List the levels of organisation from cell to organism.

Long / application (3 marks each)

Q11

[3]

Draw up a comparison of a plant cell and an animal cell, giving at least three differences and two similarities.

Q12

[3]

Explain, with two examples, the idea that "the shape of a cell is related to its function".
