

Practice — The World of Microorganisms

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 · MCQ

[1]

Which group of microbes is **acellular** and multiplies only inside a host?

(a) bacteria (b) fungi (c) viruses (d) protozoa

Q2 · MCQ

[1]

Amoeba and Paramecium belong to which group?

(a) algae (b) protozoa (c) fungi (d) bacteria

Q3 · MCQ

[1]

Yeast is a —

(a) unicellular fungus (b) bacterium (c) alga (d) virus

Q4 · MCQ

[1]

Which microbe contains chlorophyll and makes its own food?

(a) bacteria (b) fungi (c) algae (d) viruses

Q5 · TRUE / FALSE

[1]

All microorganisms can be seen with the naked eye.

(a) True (b) False

Q6 · FILL IN THE BLANK

[1]

The word microorganism comes from *micro* (very small) and *organism* (_____).

Q7 · FILL IN THE BLANK

[1]

Bacteria can be spherical, rod, comma or _____ shaped.

Short answer (2 marks each)

Q8

[2]

Name the four main groups of microorganisms and give one example of each.

Q9

[2]

Give two ways in which viruses differ from other microorganisms.

Q10

[2]

State two places where microorganisms are found.

Long / application (3 marks each)

Q11

[3]

A student observes pond water and soil suspension under a microscope. List the kinds of microorganisms likely seen in each, and explain why a microscope is essential.

Q12

[3]

Classify these as unicellular or multicellular and name the group: (i) Amoeba (ii) bread mould (iii) Lactobacillus (iv) yeast.
