

Practice — Microbes in Our Lives

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)**Q1 • MCQ****[1]**

Which microbe makes dough rise by producing carbon dioxide?

- (a) Lactobacillus (b) yeast (c) Rhizobium (d) Amoeba

Q2 • MCQ**[1]**

Curd is formed from milk by —

- (a) Rhizobium (b) yeast (c) Lactobacillus (d) a virus

Q3 • MCQ**[1]**

Rhizobium bacteria living in legume root nodules help by —

- (a) producing alcohol (b) trapping nitrogen from air to enrich soil (c) curdling milk
(d) causing disease

Q4 • MCQ**[1]**

Why do pickles with lots of salt or sugar not spoil easily?

- (a) they are cooked (b) high salt/sugar stops microbes growing (c) they have no water at all
(d) microbes like sour food

Q5 • ASSERTION-REASON**[1]**

A: Microbes are useful in cleaning the environment.

R: Bacteria and fungi decompose dead matter into nutrient-rich manure.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

The gas mixture produced when microbes break down waste without oxygen is called _____.

Q7 · FILL IN THE BLANK

[1]

Breaking down of dead plants/animals into simpler nutrients by microbes is called _____.

Short answer (2 marks each)

Q8

[2]

State the role of yeast and of Lactobacillus, naming the substance each produces.

Q9

[2]

How do microbes help keep soil fertile? Mention decomposition and Rhizobium.

Q10

[2]

Give two methods of preventing food spoilage and explain how they work.

Long / application (3 marks each)

Q11

[3]

Aanandi puts sugar solution in two test tubes A and B, adds yeast only to B, fits a balloon on each and keeps them warm. After a few hours the balloon on B inflates. Explain the result and how she could prove the gas is carbon dioxide.

Q12

[3]

"Microorganisms are both our friends and our foes." Justify this statement with two beneficial and two harmful roles.
