

Answer Key — What Is Health?

Final answer with a one-line reason. Full methods are in the Notes' worked examples.

Objective

- Q1** (b) **complete physical, mental and social well-being** — the WHO definition includes physical, mental and social well-being.
-
- Q2** (c) **feeling tired** — tiredness is felt by the patient — a symptom.
-
- Q3** (b) **AQI (Air Quality Index)** — the Air Quality Index (AQI) shows how clean the air is.
-
- Q4** (b) **False** — social and mental well-being are part of health too.
-
- Q5** (a) **Both true, R explains A** — fever can be measured, so it is a sign — exactly as R says.
-
- Q6** **dinacharya** — dinacharya is the daily routine (ritucharya is seasonal).
-
- Q7** **mental** — physical, mental and social well-being.
-

Short answer

- Q8** Health = complete physical, mental and social well-being, not merely the absence of disease.
Aspects: physical, mental, social.
-
- Q9** A symptom is what the patient feels (e.g. pain); a sign is what can be seen or measured (e.g. fever/rash).
-
- Q10** Balanced diet, regular exercise, enough sleep, limiting screen time, personal hygiene, yoga, saying no to tobacco/alcohol (any four).
-

Long / application

- Q11** His **social** health suffered (lonely, no friends), affecting his **mental** health (sad, sleepless) and then his **physical** health (weight loss, headaches). Steps: reduce screen time, meet a counsellor, make friends, exercise and keep a routine (any two).
-
- Q12** Clean air prevents breathing problems like coughing/asthma (polluted city air harms lungs); clean water and surroundings prevent disease-spreading flies/mosquitoes, so people fall sick less often.
-
