

Answer Key — Communicable Diseases and Their Spread

Final answer with a one-line reason. Full methods are in the Notes' worked examples.

Objective

- Q1 **(b) Malaria** — malaria is caused by a protozoan, spread by mosquitoes.
-
- Q2 **(b) bacteria** — TB is a bacterial disease of the lungs.
-
- Q3 **(a) Cholera** — cholera spreads via contaminated water/food.
-
- Q4 **(c) using mosquito nets/repellents and removing still water** — controlling mosquitoes prevents these vector-borne diseases.
-
- Q5 **(b) False** — dengue is caused by a virus (spread by mosquitoes).
-
- Q6 **worms** — roundworms cause ascariasis.
-
- Q7 **mask** — a mask reduces spread of air-borne pathogens.
-

Short answer

- Q8 Air-borne: cold/flu, chickenpox, measles, TB (any two). Water/food-borne: cholera, typhoid, hepatitis A (any two).
-
- Q9 Malaria — protozoa; Dengue — virus; Cholera — bacteria; TB — bacteria.
-
- Q10 Wash hands with soap, cover mouth/nose when coughing, wear a mask in crowds, drink clean water, eat cooked food, don't share personal items (any three).
-

Long / application

- Q11 **School:** ask sick students to stay home/isolate, improve ventilation/hygiene, encourage masks and handwashing. **You:** wash hands often, cover mouth when coughing, wear a mask, avoid sharing items, stay home if unwell (any two each).
-
- Q12 **Before:** learn about the area, carry repellents/nets, follow any health advisory. **During:** use mosquito nets and repellents, wear long-sleeved clothes, avoid areas with still water. **After:** watch for fever/chills and see a doctor if symptoms appear.
