

Mock Test — Exploring Forces

A mixed paper covering the whole chapter. Total: 20 marks. Section A is interactive.

Objective (1 mark each)

Q1 • MCQ**[1]**

The SI unit of force is the —

- (a) newton (b) joule (c) pascal (d) watt

Q2 • MCQ**[1]**

Which is NOT an effect of force?

- (a) change of speed (b) change of direction (c) change of shape (d) change of colour

Q3 • MCQ**[1]**

Friction acts —

- (a) along the motion (b) opposite to the motion (c) upward (d) only on magnets

Q4 • MCQ**[1]**

Which force is always attractive?

- (a) magnetic (b) electrostatic (c) gravitational (d) friction

Q5 • MCQ**[1]**

Like charges —

- (a) attract (b) repel (c) do nothing (d) combine

Q6 • TRUE / FALSE**[1]**

Friction is a non-contact force.

- (a) True (b) False

Q7 · FILL IN THE BLANK

[1]

A push or a pull is called a _____.

Q8 · FILL IN THE BLANK

[1]

The force from our muscles is called _____ force.

Short answer (2 marks each)

Q9

[2]

Define force and list any two effects it can have.

Q10

[2]

Give two differences between contact and non-contact forces with one example each.

Q11

[2]

State the rule for like and unlike charges, and name the force involved.

Long / application (3 marks each)

Q12

[3]

Classify these and justify each: friction, magnetic force, gravity. Which acts only on contact, and which is always attractive?

Q13

[3]

Explain why (i) a moving bicycle stops if you stop pedalling and (ii) a rubbed balloon sticks to a wall.
