

Practice — Formation of Wind

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)**Q1 • MCQ****[1]**

Wind is air moving from a region of —

- (a) low to high pressure (b) high to low pressure (c) hot to cold only (d) land to sky

Q2 • MCQ**[1]**

Where air moves at high speed, the pressure —

- (a) increases (b) decreases (c) stays the same (d) becomes zero

Q3 • MCQ**[1]**

During the day, the sea breeze blows —

- (a) from land to sea (b) from sea to land (c) upward only (d) it does not blow

Q4 • MCQ**[1]**

During a storm with high-speed winds, it is safer to keep doors and windows —

- (a) tightly shut (b) open (c) half-painted (d) locked

Q5 • ASSERTION-REASON**[1]**

A: Roofs may be blown off in high-speed winds.

R: Fast wind over a roof lowers the pressure above it, while pressure below stays higher.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

At night, the wind that blows from land to sea is called the _____ breeze.

Q7 · FILL IN THE BLANK

[1]

The greater the pressure difference, the _____ the wind.

Short answer (2 marks each)

Q8

[2]

In which direction does air move to form wind, and what decides the wind's speed?

Q9

[2]

Differentiate between a sea breeze and a land breeze.

Q10

[2]

Why is it advised to keep windows open during a high-speed windstorm?

Long / application (3 marks each)

Q11

[3]

Explain, using pressure, how a sea breeze forms during the day.

Q12

[3]

You blow hard between two suspended balloons and they rush together; blowing harder makes them approach faster. Explain the observation and the principle behind it.
