

Mock Test — Pressure, Winds, Storms, and Cyclones

A mixed paper covering the whole chapter. Total: 20 marks. Section A is interactive.

Objective (1 mark each)

Q1 • MCQ**[1]**

Pressure = force ÷ _____.

- (a) volume (b) area (c) mass (d) time

Q2 • MCQ**[1]**

A force of 90 N on 3 m² gives a pressure of —

- (a) 270 Pa (b) 30 Pa (c) 93 Pa (d) 3 Pa

Q3 • MCQ**[1]**

Liquid pressure depends on the _____ of the liquid column.

- (a) colour (b) height (c) width (d) lid

Q4 • MCQ**[1]**

Wind blows from a region of —

- (a) low to high pressure (b) high to low pressure (c) cold to hot (d) sea to sky

Q5 • MCQ**[1]**

The calm centre of a cyclone is the —

- (a) eye (b) tail (c) wall (d) base

Q6 • TRUE / FALSE**[1]**

High-speed winds are accompanied by increased air pressure.

- (a) True (b) False

Q7 · FILL IN THE BLANK

[1]

The SI unit of pressure is the _____.

Q8 · FILL IN THE BLANK

[1]

A storm with thunder and lightning is a _____.

Short answer (2 marks each)

Q9

[2]

Define pressure and calculate the pressure when 120 N acts on 4 m².

Q10

[2]

Why are overhead tanks placed at a height and dam bases made broad?

Q11

[2]

State the direction of the sea breeze and the land breeze.

Long / application (3 marks each)

Q12

[3]

Explain why (i) a sharp knife cuts better than a blunt one and (ii) a rubber sucker sticks to a wall.

Q13

[3]

Describe how a cyclone forms and why it loses strength over land.
