

Practice — Mixtures

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 • MCQ**[1]**

In a mixture, the components —

- (a) react chemically (b) keep their own properties (c) form a new substance (d) always vanish

Q2 • MCQ**[1]**

Which is a **uniform** mixture?

- (a) sand in water (b) sprout salad (c) sugar dissolved in water (d) oil and water

Q3 • MCQ**[1]**

Brass is an alloy of —

- (a) copper and tin (b) copper and zinc (c) iron and carbon (d) copper and nickel

Q4 • MCQ**[1]**

Lime water turns milky in air because of —

- (a) oxygen (b) nitrogen (c) carbon dioxide (d) water vapour

Q5 • TRUE / FALSE**[1]**

Air is a compound of nitrogen and oxygen.

- (a) True (b) False

Q6 • FILL IN THE BLANK**[1]**

A uniform mixture of two or more metals is called an _____.

Q7 · FILL IN THE BLANK

[1]

The substances that make up a mixture are called its _____.

Short answer (2 marks each)

Q8

[2]

Define a mixture and give one uniform and one non-uniform example.

Q9

[2]

Why is air called a uniform mixture? Name its main gases.

Q10

[2]

Name the metals in stainless steel, brass and bronze.

Long / application (3 marks each)

Q11

[3]

Differentiate between uniform and non-uniform mixtures with two examples each, and explain how alloys fit in.

Q12

[3]

Describe an activity to show that air contains carbon dioxide, and write the word equation.
