

Practice — Solute, Solvent and Solution

Section A is interactive — tap an option or type and press Check. Sections B and C are written practice.

Objective (1 mark each)

Q1 • MCQ**[1]**

A solution is a —

- (a) non-uniform mixture (b) uniform mixture (c) pure element (d) compound

Q2 • MCQ**[1]**

In a sugar solution, sugar is the —

- (a) solvent (b) solute (c) solution (d) mixture

Q3 • MCQ**[1]**

When two liquids form a solution, the solvent is the one present in the —

- (a) smaller amount (b) larger amount (c) middle (d) top layer

Q4 • MCQ**[1]**

Which forms a true solution with water?

- (a) chalk powder (b) sand (c) sugar (d) sawdust

Q5 • ASSERTION-REASON**[1]**

A: In gulab jamun syrup, water is the solvent.

R: The solvent is the substance that dissolves the other.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Q6 · FILL IN THE BLANK

[1]

Solute + Solvent → _____.

Q7 · FILL IN THE BLANK

[1]

Because it dissolves so many substances, water is called a good _____.

Short answer (2 marks each)

Q8

[2]

Define solute, solvent and solution with an example.

Q9

[2]

How do you decide which is the solute and which is the solvent when two liquids mix?

Q10

[2]

Why is salt water a solution but sand in water is not?

Long / application (3 marks each)

Q11

[3]

Explain, with examples, how the solute and solvent are identified in (i) a solid dissolved in a liquid and (ii) two liquids mixed together.

Q12

[3]

Why does every sip of homemade ORS taste the same, and what does this tell you about the type of mixture?
